

## วิธีการติดตั้ง SMF

 เข้าไปที่ www.bizqsoft.com:2222 (สมมติว่าชื่อเว็บเราคือ bizqsoft.com นะครับ) แล้ว Login เพื่อเข้าไปที่ Direct Admin ซึ่งเป็น Control Panel ของเราเมื่อเข้ามาแล้วเราก็ไปสร้างฐานข้อมูลขึ้นมา เพื่อใช้ในการ install SMF โดยไปที่ เมนู MySQL Management

1.1 เมื่อเข้ามาแล้วก็คลิกที่ Create new Database เพื่อสร้างฐานข้อมูล แล้วอย่าลืมจำหรือจด ชื่อฐานข้อมูล ชื่อผู้ใช้และ รหัสผ่านที่เราตั้งตอนสร้างเอาไว้ด้วยนะ

Continue

 อัพโหลดไฟล์ทั้งหมดที่เราได้แตกเอาไว้ ซึ่งจะได้เป็นโฟลเดอร์ smf\_2-0-8\_install (ชื่อโฟลเดอร์อาจจะไม่เหมือนกับ ตัวอย่างก็ได้นะ) เราจะอัพไฟล์ในโฟลเดอร์นี้ทั้งหมดไปที่โฮสของเรา ในที่นี้ใช้โปรแกรม Filezilla ในการอัพโหลดไฟล์ไป ยังโฮสซึ่งเป็นโปรแกรมฟรี

Database Server	Settings
	U Contrago
These are the settings to us	e for your database server. If you don't know the values, you should ask your host what they are.
Database type:	MySQL V
	Multiple supported database types were detected - which do you wish to use. Please note that running pre-SME 2.0 RC3 along with pawer SME
	versions in the same PosteroSOL database is not supported. You need to user release note that familying the One and the same posteroSOL database is not supported. You need to uporade your older installations in that case.
Server name:	localhost
	This is nearly always localhost - so if you don't know, try localhost.
Lisername:	
osemane.	
	Fill in the username you need to connect to your database here.
	If you don't know what it is, try the username of your ftp account, most of the time they are the same.
Password:	
	Here, but the persward you peed to consert to your database
	If you don't know this, you should to the password to your ftp account.
Database name:	smf
	Fill in the name of the database you want to use for SMF to store its data in. If this database does not exist, this installer will try to create it.
Table prefix:	
Table prenz.	smt_
	The prefix for every table in the database. Do not install two forums with the same prefix!
	This value allows for multiple installations in one database.
	<b>Г</b>

## 6. ตรงนี้กด "Continue" ไปเลย

Your settings have now been saved and the database has been populated with all the data required to get your forum up and running. Summary of population:

Created 63 tables.

Inserted 779 rows.

Click "Continue" to progress to the admin account creation page.

 เสร็จสิ้นการติดตั้งแล้วครับตรงนี้ให้เลือกตรง Click here delete this ..... ก็เป็นอันเสร็จครับคือมันจะให้เราลบไฟล์ install.php ทิ้งครับไม่อย่างนั้นอาจจะใช้งานไม่ได้

F Installer	si 🔬	mplemachines forum
	Progress	
	Step 1: Welcome	
	Step 2: Writable Check	
1000/ Overall Dreamen	Step 3: Database Settings	
100% Overall Progress	Step 4: Forum Settings	
	Step 5: Database Population	
	Step 6: Admin Account	
	Step 7: Finalize Install	

If at any time you need support, or SMF fails to work properly, please remember that help is available if you need it.

Your installation directory is still writable. It's a good idea to chmod it so that it is not writable for security reasons.

Click here to delete this install.php file now. (doesn't work on all servers.)

Now you can see your newly installed forum and begin to use it. You should first make sure you are logged in, after which you will be able to access the administration center.

Good luck! Simple Machines
